Alliance for Rural Electrification

Club ER meeting Abijan 2012
Balthasar Klimbie, Vice President
Temperature is -10 Celsius
“We in the Alliance share the vision that renewable energy must become a substantial pillar of the energy mix of all countries.”

Ernesto Macías, CEO, WonderEnergy, Spain and President of ARE
The **only** industry association **promoting** the off-grid renewables market in rural areas of developing countries. We...

... are technology neutral

... generate **technical, legal and financial information** about rural electrification

... communicate and **advocate** for rural electrification using RES

... collect and disseminate useful, timely and relevant **market information**
We partner with international organisations, projects and initiatives, media and other businesses, as well as support a wide variety of activities that place us in a privileged position in the world of rural electrification.

Some of our current partners:
What do we do

“ARE informs policymakers about what is needed to make renewable energy projects successful in the long run. In doing so, ARE prepares the ground for the RE markets of the future.”

Michael Wollny, Director Business Development, SMA
The Alliance for Rural Electrification

**Activities**

**Working Groups**
- Technological solutions

“Best Practices”

A study realized by The Alliance for Rural Electrification
“Hybrid Mini-Grids for Rural Electrification: Lessons Learned”

A study realized by The Alliance for Rural Electrification and financed by USAID
Potential of small and medium wind

A study realized by The Alliance for Rural Electrification
Networking

We are the biggest business network in the world for our market segment.

Through our events our members network with key contacts in spheres that have a direct political and financial influence (e.g. decision makers, donors, project promoters, international organisations).

ARE also organises business delegations to markets of interest to our members.
Knowledge sharing

We offer an ongoing source of **timely and reliable market information** about renewables and rural electrification.

- **Weekly** information about ongoing **calls for tenders** and procurement information worldwide as well as **key sector news**

- **ARE** is currently setting up a **Market Study Task force** to collect market information on targeted countries.
Offer for Club ER

“ARE could be compared to a cooperative bank where members deposit their capital in experience for customers to freely access in order to build a sustainable future. We are trying to make our bank as rich as possible to support our future.”

Michel Mansard, CEO, Phaesun France
What we offer the Club ER

**Knowledge:**
- Technology AND Business models
- Publications
- Access to specialists
- Seminars and workshops
- IOREC

**Access to technology:**
- Disseminating tenders
- Back to back meetings with companies

**Platform to get your message out**
Thank you!
